Empower your applications and websites with ...

KnowWho®
Web Services for Developers

KnowWho Web Services provide a variety of comprehensive content and robust functionality. You get the information you need in real-time with no overhead. Easily consumable in JSON or XML they are perfect for application development, legislative district data appending and enhanced website functionality.

WEB SERVICE BENEFITS

- *EASY* - use JSON or XML to submit your request and then parse the return in the same format
- *FAST* - our state-of-the-art data center ensures round trip response times are normally less than a half-second
- *FLEXIBLE* - subscribe to only the levels of government you need and the level of content that you want, and pay for only the usage you require
- *SCALABLE* - submit as many requests as you need to without adding new hardware, software or personnel
- *UP-TO-DATE* - daily updates ensure you get the most accurate and comprehensive information available

ELECTED OFFICIALS DIRECTORY SERVICE

- Submit an address, 9-digit zip code or latitude & longitude and EODS will process the district matching
- Receive all the elected officials within the levels of government you want, both executive and legislative

ELECTED OFFICIALS COMMUNICATION SERVICE

- Submit the user's contact information plus an issue, subject and content entered by the user or provided by you
- Your message is delivered via our proprietary system to the appropriate federal, state and local elected officials

HERE IS HOW IT WORKS:

- You subscribe to the services you need, at the levels you want, and purchase credits that are used for each service call
- Elected Officials Directory Service (EODS) uses one credit per address for each level of government
- Elected Officials Communication Service (EOCS) uses one credit per message delivered

```xml
-<ElectedOfficial>
